Environ Facial Treatments

Environ Skin Care was developed by renowned plastic surgeon, Dr Des Fernandes to address the effects of UV radiation, pollution, stress and free radical damage without the use of botox or fillers. The Salon Treatments and homecare products contain active effective Vitamin A and C plus potent protective antioxidants which are scientifically proven to combat environmental and physical ageing of the skin.

The salon treatment uses sound waves and electrical impulses to push the products to the deepest layers of the skin working as deep as botox. The results are amazing.
